

JOB POSTING

Norcan Fluid Power – Certified Engineering Technologist - Hydraulics Leduc, AB

We are currently recruiting a Professional Engineer (PENG)/Certified Engineering Technologist (CET) for our Leduc branch. This is a significant opportunity for the right person. If you have a strong background in hydraulics, like to work smart and have a passion for making a difference we would like to hear from you.

Norcan Fluid Power, established in 1974, has emerged as Western Canada's premier supplier of hydraulic components and expertise with eight locations from Winnipeg to Langley. Our focus on quality and service is the corner stone of our business. Norcan's product lines are second-to-none, which means we sell and service some of the best brands in the industry including Bosch Rexroth.

Position Responsibilities

- Design hydraulic solutions for specific customer projects
- Translate system requirements into component selection
- Design and write software for electro-hydraulic control systems
- Design cartridge valve manifolds
- Verify stackable valve assembly specifications and maintain a library of the specifications
- Create hydraulic and electric schematics
- Create general assembly drawings
- Develop component and system testing procedures
- Perform component failure analyses and recommend corrective measures
- Perform fluid analyses and recommend corrective measures
- Troubleshoot system failures / underperformances
- Perform on-site commissioning of electro-hydraulic systems
- Provide technical support for inside and outside sales force
- Lead engineering/technical team in the branch and make recommendations for other branches as needed
- Project management from inception to completion for large and small projects
- Some fieldwork to develop customer satisfaction and promote our business
- Strong technical skills, with the ability to present technical concepts and build on customer loyalty to our product lines

Qualifications and Experience:

- PENG/CET qualification required or specific technical hydraulics experience
- 3-5 years of specific hydraulics experience is required
- Knowledge of mining, forestry, agricultural and oil and gas industries is beneficial
- Valid drivers' licence

Standard Responsibilities:

- Adhere to high ethical standards, and comply with all regulations/applicable laws
- Comply with all policies and procedures, work rules, and standard operating procedures
- Safeguard the interests of the business, our people and our customers
- This is a full-time permanent recruitment with a competitive compensation package including benefits.

Diversity and Equal Opportunity Employment

We are an equal opportunity employer committed to diversity and inclusion. We are pleased to consider all qualified applicants for employment opportunities.
