RELIABLE | EFFICIENT | FLEXIBLE

**NORCAN**
Fluid Power Ltd.

Solutions for Industry

Since 1974, Norcan has grown from a fledgling organization to a powerhouse in the West with this simple philosophy: get it right the first time.

Whatever your needs, no project is too big or small. Our facilities provide convenient in-house or field service repairs, system design, and components ready to ship.

Order quickly and easily online at norcanfp.com.

Vendor Partners

Our partnerships with leading manufacturers are key to our success. They enable us to offer a diverse range of high-quality products and provide the best-fit solutions for every application.

AC/DC Power Packs

Bucher
BVA Hydraulics
Eagle Hydraulics
Enerpac

Why Choose Norcan Fluid Power?

Norcan Fluid Power is a world-wide leader in hydraulics, pneumatics, electric panels, manifolds, and complete power unit systems. We maintain close to \$20 million worth of inventory that is ready to be picked, packed, and shipped to your facility. Simply stated, if you need a part, chances are we have it.

Getting it Right the First Time

Getting it right the first time means hiring and developing the best people, utilizing leading edge technology and processes, investing in R&D, and searching the world to bring you the best. We know improving customer satisfaction and growth through the millenium depends on our ability to achieve this standard every day. That's our goal!

Reducing Your Downtime

We know customer satisfaction means keeping downtime to a minimum. From BC to Newfoundland, Alaska to Washington state, our elite team of trouble shooters and support resources are ready to respond quickly to your needs. On-site, in the field, on the phone or over the internet, look for timely solutions that will minimize your downtime.

Creating Effective Solutions

Norcan's team of engineers and experienced hydraulic support specialists take pride in their ability to deliver cost effective solutions for your problems. Whether it's a complete design, a unique product for a special application or just a quick shipment for a replacement part, you get our best, every time.

With the latest in computer assisted design (CAD) technology and up-to-date fabrication techniques, tempered by years of practical experience, Norcan will provide you with the kind of cost efficient and effective solutions that today's sophisticated customers demand.

Only Quality Parts

A large in-house inventory and close supplier links provide you with top quality replacement parts carefully selected from the best in the business. Rexroth, Hagglunds, Gates, Hengst, Webtec, ASA and other quality suppliers are chosen to provide parts that will meet or exceed manufacturers specifications and stand up in rugged applications. Count on it.

Hydraulic Services

Whatever your needs, no project is too big or small. Our eight Western Canadian facilities can easily accommodate any type of equipment for convenient service and repairs all year long.

Engineering & Design

Our centralized engineering department, which supports all branches, specializes in hydraulic system design and custom control solutions. Additionally, we provide AutoCAD drawings and models as required, ensuring precise, high-quality deliverables for each project.

We also offer remote support to assist with any technical needs, ensuring that our clients have access to expert assistance no matter where they are. With our comprehensive capabilities, we are well-equipped to handle complex engineering challenges efficiently and effectively.

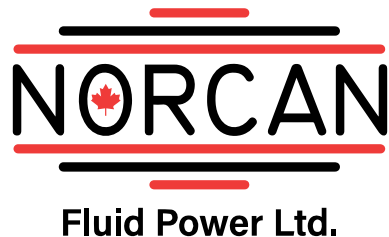

Safety Program

Norcan Fluid Power has implemented a comprehensive corporate safety program across all locations to ensure the well-being of our team and clients. Monthly safety meetings are held, documented, and reported to maintain a proactive safety culture.

In addition, we have established safety processes for Field Level Risk Assessments. Our technicians are trained to evaluate, document, and assess potential hazards before starting any work at customer locations, ensuring safety is always a top priority.

- Complete system or subsystem design, fabrication, installation and training, "turnkey" convenience with start-up and after sales service
- Manufacturing, modification and upgrades for systems and components
- Complete rebuilding and testing of hydraulic components, all to manufacturer's original specifications
- The only Bosch Rexroth trained and certified repair center for proportional and high response valves in Western Canada
- Pump, motor, and valve conversion programs provide fast delivery for new and replacement situations, including crossing over other brands
- Cylinder repair, honing and machining capabilities
- Troubleshooting, technical support, and after hours in-house and field service capabilities 24/7
- Fleet hydraulic maintenance and oil cleanliness monitoring
